

Proceedings of Conference on Status of Geologic Research and Mapping, Death Valley National Park

Janet L. Slate, Editor

U.S. GEOLOGICAL SURVEY

Open-File Report 99-153

Denver, Colorado
1999

U.S. DEPARTMENT OF THE INTERIOR
Bruce Babbitt, Secretary

U.S. GEOLOGICAL SURVEY
Charles G. Groat, Director

This report is preliminary and has not been reviewed for conformity with U.S. Geological Survey editorial standards (or with the North American Stratigraphic Code).

Any use of trade, product, or firm names in this publication is for descriptive purposes only and does not imply endorsement by the U.S. Government

CONTENTS

PROLOGUE	1
H. Donald “The Kid” Curry, Death Valley’s First Ranger-Geologist (1908-1999)	
Vincent L. Santucci and Torrey Nyborg.....	1
INTRODUCTION	2
DEATH VALLEY NATIONAL PARK.....	3
<i>Posters:</i>	
Geologic highlights of Death Valley National Park	
Michael N. Machette, Ren A. Thompson, and Mel Essington.....	3
Status of geologic mapping in Death Valley National Park—A database	
A.S. Jayko, M. Essington, Bruce Heise, H.E. Johnson, P.W. McGrath, D.W. Prichett, G. Saucedo, R. Thompson, and D. Wagner	5
How to get a research permit from Death Valley National Park	
Richard L. Anderson	6
National Park Service Geologic Resources Inventory	
Joe Gregson and Bruce Heise	7
Inventorying paleontological resources at Death Valley National Park	
Torrey G. Nyborg and Vincent L. Santucci.....	7
Accessing Death Valley National Park’s Museum Collection for geological and paleontological research	
Blair Davenport.....	8
REGIONAL STRUCTURE, TECTONICS, AND BEDROCK GEOLOGY	10
<i>Keynote speakers:</i>	
Tectonic evolution of the Death Valley region	
Brian Wernicke.....	10
Tectonics of the southwestern Death Valley Region—A progress report	
Terry L. Pavlis and Laura Serpa.....	18
Architecture and Miocene evolution of the northeast Death Valley detachment fault system, Nevada and California	
Chris Fridrich	20
<i>Posters:</i>	
Temporal, spatial, and compositional constraints on extension-related volcanism in central Death Valley, California	
R.A. Thompson, L.A. Wright, C.M. Johnson, and R.J. Fleck	27
Fluid flow during metamorphism and deformation in the Panamint Mountains	
Theodore C. Labotka	29
Preliminary results of detailed structural investigation and large-scale mapping in the southern Panamint Range, California	
Joseph E. Andrew.....	31
Magnitude and timing of extreme continental extension, central Death Valley region, California	
N.A. Niemi, B.P. Wernicke, R.J. Brady, J.B. Saleeby, and G.C. Dunne	33
Field and laboratory studies of fault rocks from detachment faults, western Black Mountains, Death Valley	
Darrel Cowan, Trenton Cladouhos, Nicholas Hayman, Julia Morgan, and Peter Vrolijk	36

Evidence for pre-55 Ma Phanerozoic fabrics in the Black Mountains, Death Valley, California	37
Martin G. Miller, Henry Turner, and Richard M. Friedman	37
Structural features of the Amargosa fault near Virgin Spring Canyon	
Charles Rogers and Martin G. Miller	39
NEOGENE BASIN STRATIGRAPHY, GEOPHYSICS, AND HYDROLOGY	41
<i>Keynote speakers:</i>	
Cenozoic basins of the central Death Valley region, eastern California	
L.A. Wright	41
Looking beneath the surface, a three-dimensional geophysical view of the Death Valley region, California and Nevada	
Richard J. Blakely, Robert L. Morin, and Claudia C. Faunt.....	47
The Death Valley Regional Ground-Water Flow System (DVRFS) model—Calibration versus hydrogeologic conceptual model testing	
Frank A. D'Agnese and Claudia C. Faunt	52
<i>Posters:</i>	
<i>Stratigraphy:</i>	
Preliminary description of the subsurface geologic units in the Amargosa Desert	
Emily M. Taylor, Christopher M. Menges, and Carma San Juan	55
Tectonostratigraphic relationship between the Cenozoic sedimentary successions of the southern Funeral Mountains, Furnace Creek Basin, Eagle Mountain, and the north end of the Resting Spring Range	
Ibrahim Cemen	56
<i>Geophysics:</i>	
Three-dimensional model of pre-Cenozoic basement beneath Amargosa Desert and Pahrump Valley, California and Nevada—Implications for tectonic evolution and water resources	
Robert L. Morin, Richard J. Blakely, E.H. McKee, Kevin M. Schmidt, Victoria E. Langenheim, and Gary L. Dixon	58
<i>Hydrology:</i>	
Using geologic data for a three-dimensional hydrogeologic framework model of the Death Valley region	
Claudia C. Faunt, Wayne R. Belcher, and Frank A. D'Agnese	59
Ground-water flow model of Amargosa Valley and Yucca Mountain Site revisited	
Parviz Montazer and Nick Stellavato	60
Development of a hydrogeologic database and data analysis tool for the Death Valley regional ground-water flow model	
Grady M. O'Brien, Matthew L. Jones, and Claudia C. Faunt	61
Correlations of lithostratigraphic features with hydrogeologic properties, a facies-based approach to model development in volcanic rocks at Yucca Mountain, Nevada	
David C. Buesch and Richard W. Spengler	62
Using multivariate statistical analysis of ground-water major cation and trace-element concentrations to evaluate ground-water flow in south-central Nevada	
Irene M. Farnham, Kevin H. Johannesson, Ashok K. Singh, Klaus J. Stetzenbach, and Xiaoping Zhou	64
Rare earth elements in ground water and aquifer materials from southern Nevada and eastern California	
Xiaoping Zhou, Kevin H. Johannesson, Klaus J. Stetzenbach, Caixia Guo, and Irene M. Farnham	66

Estimating evapotranspiration rates in Death Valley, California	68
Guy A. DeMeo, Randell J. Lacznak, and Walter E. Nylund	68
Ostracodes as indicators of present and past hydrology in Death Valley	69
Richard M. Forester	69

MAPPING IN THE DEATH VALLEY REGION.....71

Posters:

Regional geologic maps of the Nevada Test Site and Death Valley ground-water flow system—	
The starting points for ground-water studies	
Peter D. Rowley, Jeremiah B. Workman, Gary L. Dixon, Janet L. Slate, Karen S. Morgan, E.B. Ekren, David A. Ponce, William R. Page, Mel A. Kuntz, and Douglas A. Trudeau	71
Geologic map of the Trona-Kingman 1:250,000 quadrangle, southeastern California	
Eugene Y. Hsu and David L. Wagner	73
Tectonic-geologic map of the Death Valley region, California and Nevada	
L.A. Wright, R.A. Thompson, and J.B. Workman	73
Regional hydrogeologic features from a new geologic map of the Yucca Mountain region	
C.J. Potter and D.S. Sweetkind	75
Preliminary surficial geologic map of the Beatty 30 × 60-minute quadrangle, Nevada-California	
Janet L. Slate and Margaret E. Berry	78
Strategy for mapping Quaternary surficial deposits in support of the Death Valley regional flow model in California and Nevada	
Christopher M. Menges, Emily M. Taylor, Janet L. Slate, and John C. Dohrenwend	81
Geology of the Saddle Peak Hills 7.5' quadrangle, southernmost Death Valley, California	
Bennie W. Troxel	83

IMAGERY, QUATERNARY STRATIGRAPHY AND GEOMORPHOLOGY, AND QUATERNARY GEOCHRONOLOGY.....85

Keynote speakers:

Thirty years of remote sensing in Death Valley—What have we learned?	
Alan Gillespie	85
Quaternary stratigraphy and geomorphology of Death Valley	
J.R. Knott	90
Quaternary dating methods—Applications to Death Valley studies	
Marith Reheis	97

Posters:

<i>Imagery:</i>	
Imaging radar applications in the Death Valley region	
Tom G. Farr	104
Regional 1:100,000 mapping of Quaternary units from SPOT images and 30-m DEMs	
A.S. Jayko and D.W. Prichett	106
Differential GPS/GIS analysis of the sliding rock phenomenon of Racetrack Playa, Death Valley National Park	
Paula Messina and Phil Stoffer	107

Quaternary Stratigraphy and Geomorphology:

Quaternary geologic mapping and geochronology of the Las Vegas 1:100,000 sheet and Yucca Mountaain area—Geomorphic and hydrologic response to climate change near Death Valley	
S.C. Lundstrom, J.B.Paces, S.A. Mahan, W.R. Page, and J.B. Workman	110

A soil survey of Death Valley National Park—New techniques in standard soil survey	111
Douglas J. Merkler, Leon Lato, and Peter Scull	
Surficial geology and geomorphic process studies in support of multidisciplinary ecosystem investigations—Examples from parts of Greenwater and Valjean Valleys, Mojave Desert Ecosystem	113
David M. Miller and James C. Yount	
<i>Quaternary Geochronology:</i>	
Late Cenozoic tephrochronology of Death Valley, California—New insights into stratigraphy, paleogeography, and tectonics	115
J.R. Knott, Andrei M. Sarna-Wojcicki, Ralph E. Klinger, John C. Tinsley, III, and Bennie W. Troxel.....	
Chlorine-36 ages of pluvial shoreline features in the Death Valley/Panamint Valley area	117
Fred M. Phillips and Marek G. Zreda	
Geochemistry of archeological obsidian sources in the Saline Range, Death Valley National Park, California	118
Lynn Johnson, David L. Wagner, and Craig E. Skinner.....	
PALEOCLIMATE AND ACTIVE TECTONICS	121
<i>Keynote speakers:</i>	
Middle to late Quaternary environmental changes in Death Valley and vicinity	
W. Geoffrey Spaulding.....	121
Latest Quaternary (<30 ka) lake high-stand fluctuations and evolving paleohydrology of Death Valley	
Diana Anderson	124
Tectonic geomorphology along the Death Valley fault system—Evidence for recurrent late Quaternary activity in Death Valley National Park	
Ralph E. Klinger.....	132
<i>Posters:</i>	
<i>Paleoclimate:</i>	
Lake Manly(?) shorelines in the eastern Mojave Desert, California	
Roger LeB. Hooke.....	140
200-k.y. paleoclimate record from Core DV 93-1, Badwater Basin, Death Valley, California	
Tim Lowenstein.....	142
Using event-based simulation of water budgets to study the hydroclimatology of lakes in Death Valley, California	
Larry Mayer.....	144
Eolian processes and deposits in the southwestern U.S.—Integrated studies to evaluate impacts from climatic variability and land use	
U.S. Geological Survey and Desert Research Institute	146
<i>Active Tectonics:</i>	
Scenario earthquakes along the Death Valley fault system	
Craig M. dePolo and Ron H. Hess	148
GPS-determined constraints on interseismic deformation along active fault zones within the Death Valley region, southeastern California	
Todd B. Williams, Daniel J. Johnson, M. Meghan Miller, and Timothy H. Dixon.....	149
Seismic potential of the Fish Lake Valley fault zone, Nevada and California	
T.L. Sawyer and M.C. Reheis	150
Quaternary strike-slip components of the Death Valley fault between the Furnace Creek and southern Death Valley fault zones	
D. Burton Slemmons and George E. Brogan	152

Using geomorphic features to constrain tectonic activity near Pahrump Valley, Nevada and California	
K.M. Schmidt and J.G. Davidson	154
USGS geologic and seismic-hazard investigations of the Cow Creek area, Death Valley National Park	
Michael N. Machette, Anthony J. Crone, Kathleen M. Haller, Lee-Ann Bradley, Carlos Ninci Martinez, and Giuliana D'Addezio	156
Late Quaternary flexural-slip folding and faulting in the Texas Spring syncline, Death Valley National Park	
Ralph E. Klinger and Lucille A. Piety	159
Geology of the Stump Spring quadrangle—Evidence of late Quaternary transgression on the southern segment of the Pahrump Valley fault zone, Nevada and California	
Matthew R. McMackin	162
Work in progress—A connection through the brittle crust between Death Valley and the Salton Basin	
Robert O. Castle.....	163

FIELD TRIP GUIDE..... **165**

Stop 1: Mormon Point/Willow Creek Fault Scarp.....	165
Terry L. Pavlis	
Jeffrey R. Knott	
Ralph E. Klinger and Lucille A. Piety	
Stop 2: Badwater.....	170
Tim Lowenstein	
Diana E. Anderson	
Martin G. Miller	
Stop 3: Zabriskie Point.....	171
Lauren A. Wright	
Richard J. Blakely	
Stop 4: Texas Spring Syncline/Echo Canyon Thrust.....	172
Ralph E. Klinger and Lucille A. Piety	
Stop 5: Cow Creek Administrative Area	174
Michael N. Machette	

Selected references for geology of Death Valley National Park and surrounding region (on disk)

Compiled by Philadelphia J. Morrow and Michael N. Machette

FIGURES

1. Geologic mapping of the Wernicke research group	11
2. Map showing reconstruction of deformation, southern Great Basin region	13
3. Location map of the northeast Death Valley detachment fault system	21
4. Schematic cross sections, showing stages in the evolution of the detachment fault system	22
5. Maps showing areas of strong transtensional tectonism pattern, northeast Death Valley	24
6. Graph showing relation of fluid composition and temperature of metamorphism in samples from Wildrose Canyon.....	30
7. Graph showing isotopic composition of calcite versus dolomite	30
8. Graph showing relation of metamorphic fluid versus temperature in samples from the Johnnie Formation	30
9. Map showing major ranges and basins in the Death Valley region.....	33
10. Columnar sections of middle and upper Miocene strata	34
11. Map showing probable original limits of the Eagle Mountain Formation.....	35
12. Photographs of deformed pegmatite	37
13. Photograph and field sketch of relations at deep structural levels	38
14. Schematic cross section to illustrate relation between pre-pegmatite and post-pegmatite fabrics	38
15. Simplified map of the Amargosa fault	39
16. Map showing generalized geology of the central Death Valley region.....	42
17. Sketches showing gravity inversion method	48
18. Diagram of lithostratigraphic and hydrogeologic units in the Prow Pass Tuff	63
19. Shaded relief map of the Yucca Mountain Region	76
20. Grid showing 7.5-minute quadrangles of the Beatty 30 × 60-minute quadrangle	78
21. Map of Death Valley and surrounding region showing geographic features and fault systems	90
22. Correlation diagram for Pliocene tuffs of Death Valley	91
23. Correlation diagram for upper Pliocene to middle Pleistocene tuffs and tephra beds of Death Valley	93
24. Chart showing methods for dating Quaternary surficial deposits in the Death Valley area.....	98
25. Oblique USGS aerial image of the Racetrack.....	108
26. Large-scale detail of trails in the Racetrack's central region.....	108
27. Photograph of two diverging sliding cobbles.....	108
28. Scatterplot based on XRF data showing Saline Valley glass types	119
29. Scatterplot showing correlation of artifacts manufactured from the "Saline Valley" and "Queen Imposter" glass type.....	120
30. Map showing pluvial lakes in basins of Owen, Mojave, and Amargosa Rivers	125
31. Longitudinal profile of coring sites.....	128
32. Composite diagram of 10–30-ka lacustrine chronologies for the Mojave River drainage basin.....	129
33. Generalized Quaternary fault map of Death Valley	133
34. Photograph of Cinder Hill, a basaltic cinder cone astride north end of the Southern Death Valley fault.....	134
35. Photograph of Willow Creek scarp	136
36. Aerial photograph of an alluvial fan north of Red Wall Canyon	138
37. Topographic profile from Shoreline Butte to Ash Hill	141
38. Sample-model run for Death Valley showing temperature-derived evaporation potential	144
39. Earthquake-rupture segmentation model of the Fish Lake Valley fault zone	151
40. Graph showing product of contributing drainage area and local slope versus valley width to valley height ratio	155
41. Photograph of the Cross Valley fault scarp north of the Hole-in-the-Wall road	159
42. Graph showing maximum vertical separation of alluvial surfaces along the Cross Valley fault.....	160
43. Schematic illustration showing essential elements involved with the postulated connection between Death Valley and the Salton Basin	163
